GEBERIT FLUSH PLATES
CHOICE IS
IMPORTANT

DESIGN
MEETS
FUNCTION

MAKE IT
YOUR OWN

It's not just any bathroom, it's your bathroom. You select the tiles that reflect your style. You refuse to compromise in the selection of the tap for your washbasin. And here you will find just the right flush plate for the WC to give your bathroom the crowning touch and pamper you with comfort functions. This is because Geberit combines visual elegance with innovative functions.

Cover plate: Geberit Sigma70, red gold
WHY NOT TRY OUT YOUR OWN DESIGNS?
We have included actual-size illustrations of various flush plates in the brochure for you. Fold back the left-hand side of the brochure, hold the design up to the wall and let your imagination run wild! Use these actual-size samples to select the flush plate that appeals to you.
CONTENTS

22/44 PRECIOUS METALS
Selecting the right design options for a bathroom means ensuring that individual nuances are perfectly coordinated. Flush plates in new, fashionable metal colours are the perfect match for the latest trends in taps, while plates made of glass, concrete-look solid surface materials or natural Mustang slate and black walnut blend harmoniously into almost any decor style. The ideal combination for your dream bathroom is just waiting for you to discover it.

SIGMA70

FLOATING DESIGN,
MINIMALIST AESTHETIC

A sleek, frameless design, convex surface and slimline structure combine to create the floating illusion of this innovative flush plate. Its clean, geometric design and sophisticated materials meet the highest aesthetic standards and make the plate a firm favourite for all those who appreciate its architectural design language.

PRECISION MECHANICS

The Geberit Sigma70 flush plate uses a tried-and-tested mechanism with two perfectly coordinated buttons for the water-saving dual flush. The gap between the buttons is so narrow and precise that the surface of the plate appears to be made of a single piece. This minimalistic design supports simple and intuitive operation.

VARIETY

Sophisticated materials and elegant colours underline the architecturally clean design of the Geberit Sigma70 flush plate. The plate is available in black, sand grey, lava and white glass, in red gold, black chrome and brushed stainless steel, in brass, as well as in black matt and white matt.

A variety of colours and materials for aesthetically sophisticated bathroom furnishings that have been perfected down to the last detail: Everything you need to know about Geberit Sigma70 can be found from **page 28.**

AESTHETICS
AND FUNCTION

Unobtrusive yet reliable. Geberit ensures, supreme convenience and durability, all from behind the wall. All that remains visible is the interface with the technology: the flush plate. The selection of flush plates is important because you will live with your selection for years. Choose the flush plate that best suits you and your bathroom from a wide range of options.

New ideas and functions can always be derived from a rectangular shape. This is how Geberit enables you to come up with a contemporary, personalised bathroom design.

THE PERFECT SHAPE:
THE CIRCLE

Aesthetic curves for a relaxing bathroom experience. It is impossible to improve on circles; they can only be restaged and rearranged. Geberit flush plates use new interpretations of round forms to adapt to today's trends. With or without rims. With finely honed edges. Harmoniously adjacent or flowing one into another. And the result is always well rounded.

ROUND

GEBERIT SIGMA01

Functional simplicity. Round buttons with a simple design – Sigma01 flush plates are available in a range of classic colours.

NO-TOUCH
FLUSH

Electronic hygiene. As hygiene continues to be a top priority for many, especially in the bathroom, touchless technology in flush actuation is rising in demand. By offering electronic WC flush plates using IR sensors, Geberit has a solution to meet this growing demand. And while it requires your toilet to have an electrical connection, this is a feature that is fast becoming the norm anyway.

TOUCHLESS FUNCTION

GEBERIT CISTERNS SIGMA AND OMEGA
FOR **ANY APPLICATION**

So that everything matches: used in combination with the matching concealed cistern, Geberit flush plates in the Sigma range cover a wide variety of applications and comfort functions. The Geberit flushing system Omega offers great flexibility and particularly small flush plates. Both flushing systems offer tool-free final installation and guaranteed spare parts availability for 50 years.

You therefore have a wide selection of both Geberit flush plates and reliable Geberit installation elements for installation behind the wall. And Geberit flush plates bear the name of the suitable cistern so that you can be certain that everything will match.

112 cm

98 cm

82 cm

CHOICE IS
IMPORTANT

Intelligent functions from Geberit. If you can flush your toilet without touching it, if elegant colour effects add atmospheric moments to the time you spend in your bathroom, or if unpleasant smells are efficiently extracted even before anyone notices them, then this means your plumber has installed state-of-the-art Geberit sanitary convenience in your new bathroom. And because durability and reliability are as much a part of Geberit as good design, you will enjoy your selection for years to come.
GEBERIT REMOTE FLUSH ACTUATIONS

MORE CONVENIENT
BY FAR

The optimal solution. Regardless of the construction situation, using a remote flush button can be a the right choice. For instance, in order to locate the flush button at a different location, if the design for the WC flush control calls for small but elegant, or if using a Geberit Omega concealed cistern with low construction height causes forceful contact between the WC lid and the front actuation. For such cases, Geberit offers various remote flush buttons with pneumatic force transmission, which can be placed anywhere within a 1.70 m radius of the concealed cistern.

Geberit Remote Flush
Button Type 10
Colour: White
Design ring: Bright chrome

← TOUCHED A THOUSAND TIMES
The pneumatics of the Geberit remote flush buttons type 01 and type 10 have been tested for years of stress. The technology is based on air pressure (not on electrical current).

→
QUITE DISCREET IN FACT
Available as they are in a variety of colours and product materials, the Geberit cover plates open up new design opportunities. A tile-bearing version is available for a particularly discreet appearance.

GEBERIT DUOFRESH INSERT
FOR IN-CISTERN STICKS

HYGIENIC FRESHNESS FOR WEEKS

Pull the flush plate aside, insert the stick, then close the plate. That's how easy it is to ensure weeks of hygienic freshness with the insert for in-cistern sticks. The optional insert is suitable for most Geberit flush plates in the Sigma range and can even be installed by a plumber at a later date. It guides the in-cistern stick down a chute to a fixed position below the surface of the water in the cistern. Once there, the stick dissolves slowly and ensures hygiene and cleanliness in every flush throughout the entire WC ceramic appliance, as well as providing a fresh fragrance.
1. It doesn't get any simpler than this: pull the flush plate aside.
2. Place the in-cistern stick into the insert behind the plate.
3. Close the plate and enjoy the freshness with every flush.

ODOUR EXTRACTION
FRESH AIR
FOR EVERYONE

Unpleasant odours in the toilet are a thing of the past. What is long since standard over every kitchen oven can now be applied in the bathroom. An effective way to get rid of unpleasant odours. The Geberit DuoFresh module removes the bad air directly from the WC ceramic appliance, purifies it using a ceramic honeycomb filter and then returns it to the room. This is extremely effective, as it prevents unpleasant odours from spreading throughout the bathroom in the first place, rendering air fresheners, lighting candles, opening windows and the like completely unnecessary. Thanks to a proximity sensor, the odour extraction always switches on automatically as soon as someone sits down on the toilet. The odour extraction is therefore a great idea for guest WCs. Benefit from additional comfort thanks to an LED orientation light and the insert for in-cistern sticks. The Geberit DuoFresh module can be easily installed in any Geberit Sigma cistern and can be combined with almost any flush plate from the Sigma range.

The ceramic comb filter and insert for in-cistern sticks are within easy reach located behind the flush plate.

The ceramic comb filter purifies the air thoroughly. The quiet fan conveys the cleaned air back into the room.

An additional benefit offers a built-in LED orientation light. Just below the flush plate a soft glow will guide you the way to the WC in the dark.

Unpleasant odours are removed right at the source.
