

SAUNA, STEAM & INFRARED

FINNISH SAUNA PERFECTION

The Finnish sauna is a vital part of every day, a chance for families and friends to gather and unwind. Helo was founded already 1919 so with over 100 years of expertise the brand brings health and well-being to people all over the world through innovative technique and design.

Heló was the first manufacturer of electric sauna heaters – a revolution in the market by making it possible to install saunas in any home.

A Helo sauna product elevates the daily sauna experience by adding beautiful design and expert functionality.

A FINNISH PHENOMENON

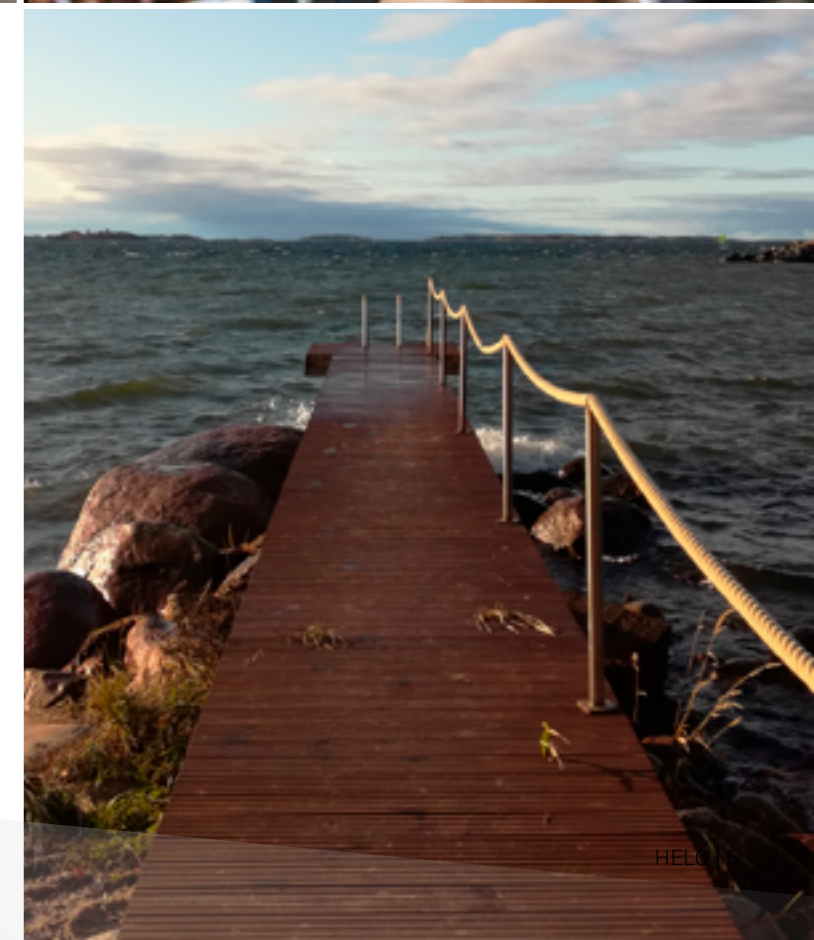

Sauna is the only Finnish word that has been internationally adopted. Helo has brought health and wellbeing to people all over the world for more than 100 years, since the start in 1919. With innovative technology, smart functionality and beautiful design, the Helo sauna product elevates the everyday sauna experience. As a vital everyday part of Finnish wellbeing, sauna bathing brings families and friends together to unwind. Records show that Finnish people are the happiest in the world, and maybe this tradition is the explanation?

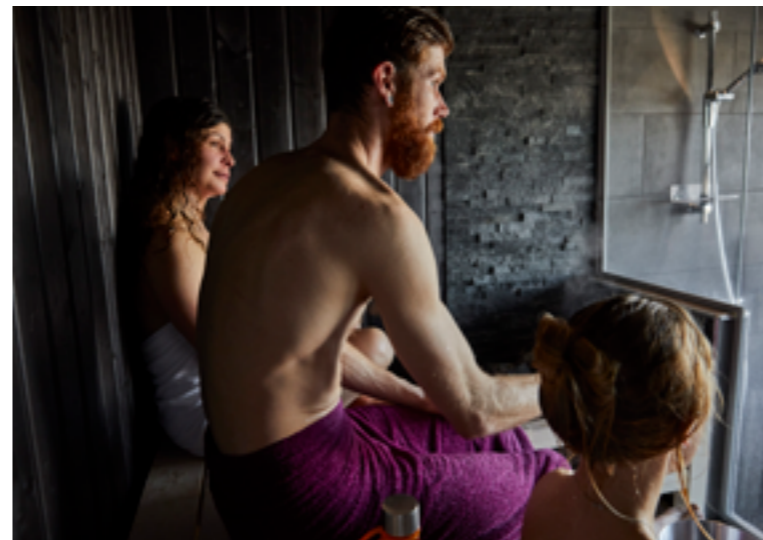

HANDMADE FOR RELAXATION

Löyly, the word for throwing water on the hot stones in a sauna, enhances the sauna bath with steam. With Helo handmade heaters you are embraced by a soft and gentle touch of steam. Should you want an even more intense steam experience, Helo-WT steam technology also comes with a water tank to release more enveloping steam. By adding fragrances, salt rocks or fresh birch leaves to it, you will fill the sauna with a soft fragrance to increase the relaxing feeling.

Helo heaters are high-quality handicraft, produced in Hanko, Finland for more than 100 years. True to their Finnish origin they are truly creating opportunity for everyone to have their own home sauna.

BENEFITS OF SAUNA

MUSCLES AND JOINTS
Quicker recovery from exercise by easing joint and muscle pain and eliminating lactic acid build-up.

CLEANSSES THE SKIN
Deep sweating cleanses the skin, and rinses off dirt, dead skin cells and bacteria.

LUNG DISEASES
It can have a good effect on asthma and pneumonia.

STATE OF MIND
Can be used in treatment for anxiety and mild depression.

BRAIN HEALTH
Regular sauna bathing can lower the risk for both Stroke and dementia.

HEART
It lowers the blood pressure and fights against heart diseases.

ENERGY
It can help you sleep better and therefore help against chronic fatigue.

SOCIAL BENEFITS
Relaxing environment for socialising with family and friends.

LAST BUT NOT LEAST: JUST FEELS GOOD
A sauna not only feels good, it's good for you.

WHY NOORALOTTA NEZIRI CHOOSED HELO FOR HER NEW SAUNA

Finnish 100-meter hurdler Nooralotta Neziri, has reached the semifinals in the World Championships and the Olympics, as well as the finals in the European Indoor Championships. In cooperation with Helo, she has recently built a unique combination of infrared and traditional sauna in her new apartment.

Why do you have a sauna in your home?

I couldn't even think about living without a sauna! I use it every week. For me, it's about relaxing, but it's also an effective way of recovering after training. It may be old, but still one of the best recovery methods.

When do you go into the sauna?

I always go to sauna in the evening. It's relaxing and helps me to sleep better. If I'm at home, I like to use the sauna the evening before a competition.

What is important in the sauna?

The atmosphere, that's why I love beautiful saunas. For a

long time, I've wanted to have IR-panels. When planning the new sauna, it was very important for me to have the infrared possibility as well.

What do you do in the sauna?

The sauna is one of those places where I don't have to do anything. I'm very bad at relaxing, so it's nice to have a place where I can just exist. The only things you can do is to talk and throw some water on the sauna stones.

How did you find out that sauna bathing is good for you?

Already when I was a kid, I used sauna before competitions to make my body feel better. At that time, I wasn't reading

"THE SAUNA IS ONE OF THE BEST RECOVERY METHODS"

Hägglund, H. (2020). Bastuboken: Heta fakta om bastu och hälsa. Ekerlids Förlag.

HELO ELECTRIC SAUNA HEATERS

All Helo heaters are high-quality electric heaters – and that is basically their only common feature. Thanks to Finnish design, technological skills and craftsmanship, the product range has something for everyone. Take a moment to consider: what type of saunas do you like, how do you want to decorate your sauna, how do you want to use and time your heater, and what design styles do you like? Once you know what you're looking for, all you need to do is to find "the one".

**DON'T FORGET

THE STONES**

helo-WT

HELO IS SYNONYMOUS TO SAUNA VARIETY

We take your sauna pleasure seriously. Therefore we have developed Helo-WT, Helo Water Tech, a revolutionary solution to suit different sauna tastes and preferences. One single sauna heater provides several varieties of soothing sauna styles. Indulge in a multi-layered sauna experience, alone or with friends and family.

Gentle Sauna:
50-60°C
temperature

Add water to Helo-WT container, set to 50-60°C

- Gentle sauna
- Enveloping steam
- Longer sessions
- Can be used as bio-aroma or salt sauna.

Flexi-Sauna:
60-80°C
temperature

Fill Helo-WT water container and set to 60-80°C

- More humidity
- Lower temperature
- A gentle sauna experience
- Can be used as bio-aroma or salt sauna.

Hot:
80-100°C
temperature

Use Helo-WT without water and set to 80-100°C

- High temperature
- Low humidity
- Intense sauna sensation.

CHOOSING THE RIGHT HELO HEATER TO SUIT YOUR SAUNA

Reach the perfect sauna experience and the greatest energy efficiency combined by considering the physical properties of your sauna room. Use the chart on the opposite page to give you an indication of heater choices and ideal power output for your sauna. To determine the heater your sauna requires, calculate the room size in cubic metres; Room Width (metres) x Room Length (metres) x Room Height (metres). If the walls or ceiling of your sauna contain non-insulated glass or heat-storing surfaces such as brick, concrete or massive logs, the heater will require more power. For each non-insulated square meter, 1,5 m³ are added to the volume of the sauna.

The sauna room efficiency chart

These guides help you choose the appropriate heater for maximum efficiency and usability.

HAVANNA

The special features of the Havana include a stone space that can be adjusted to hold 20, 28 or 35 kg of stones. A smaller amount of stones heats faster and creates stronger steam, whereas a larger amount of stones creates enjoyable and rich steam. The Havana is wall-mountable for space-saving reasons, but floor mounting is also possible using the floor mounting kit.

HELO FEET SET

Black feet set for Havana heater.
Item no. 004330

ROXX

The Roxx combines modern industrial design with natural stones. Roxx guarantees perfect sauna experience with its natural stones retaining heat efficiently, and the Helo-WT water container producing rich smooth humidity to the entire sauna. Roxx can be wall mounted, floor stading or integrated into the sauna bench. It comes with stylish control panels, Pure and Elite Free (included).

TOWER HEATERS

OUR
SMALLEST
HEATER

PICCOLO

The Piccolo has a large rock compartment for a mini heater. It conceals a water container that produces rich smooth humidity to the entire sauna.

The heater can be mounted both in a corner or on a straight wall offering different options for sauna layout.

RINGO BLACK

The Ringo have been designed for Finnish family saunas. 70 kg of sauna stones and pillar-like design provides heat efficiently, and the Helo-WT water container produces rich smooth humidity to the entire sauna. Ringo is clear and easy to use due to its built-in control unit with thermostat and a 12-hour timer including a 9-hour pre-selection and a heating time of 0-3 hours.

Ringo is floor standing heater with adjustable feet and can be attached to the wall to ensure stability. It can also be mounted to the sauna bench.

ROCHER

The Rocher holds a massive 100 kg of sauna stones in a robust brushed steel brazier. Heat radiates smoothly in every direction. The secret of the soft and relaxing heat is the full-length heating elements. Every stone is heated, top to bottom, and the greater stone surface area turns a ladle of water into gentle invigorating steam. The artfully designed steel frame completes the impressive tower of natural stone as a centerpiece of any sauna. The Rocher heater is ideal for creative interior design. It can be installed floor standing in a corner or against a wall or mounted to the sauna benches using a steel or glass collar. This also enables lighting from underneath.

HEAT-RETAINING HEATERS

SAUNATONTTU

Helo teamed up with world-renowned designer Ristomatti Ratia to develop the perfect sauna heater, and the sleek black ever-ready heater was then called Saunatonnttu or "Sauna elf". This multi-patented innovation with a great European design is hailed by many as unquestionably the world's best sauna heater. The secret of the Saunatonnttu lies in the continuous heat generated by 100 kg of stones. The small safety distances required bring flexibility to sauna interior design, and this corner model heater can also be easily mounted to the sauna benches. Saunatonnttu has a small handy controller for all heater parameters.

EVERREADY

Helo played an important part in developing the market. With ingenious solutions and aided by implicit passion for sauna amongst the general public, fine-tuning the sauna experience as a whole lay close to heart for Helo. A new era for Helo occurred in the early 1980's, when a super insulated and heat retaining stone compartment was introduced to the market. The technology was named EverReady.

Before the introduction of Helo's ingenious EverReady sauna technology, having a sauna meant switching on the heater and wait for the sauna room to reach sufficient temperature, a wait that could prove unbearable on a cold winter's day! The upscale version meant programming a rudimentary timer to get the sauna going at a certain time, which in turn, meant adjusting your daily schedule around the sauna.

The new generation electric sauna heater technology, with its super insulated stone compartment core, was also a Helo patent and meant that the heater would stay heated continuously, ready to go at any time, through maintaining heat at a very low level of energy consumption. The new heater was built on simplistic technology; lift the lid of the heated stone compartment

and you get instant radiating heat and a sauna room that is ready to use in no time. The Saunatonnttu, which was and is the name of the revolutionary heater, still remains a popular choice, and its iconic rounded shape feels as modern today as when it was first introduced almost 40 years ago.

RONDO

The Rondo is one of Helo's super-insulated storage heaters. Rondo has a round shape and patented 360 degrees rotating hatch. The hatch can be chosen to install at any angle during the installation phase. Thanks to the well-insulated shell of the heater, the 90 kg of stones retain heat extremely well, so you can enjoy a relaxing spur-of-the-moment sauna break. It is designed to be floor mounted, but it can also be integrated into the sauna benches .

COMMERCIAL HEATERS

OCTA

The Octa heater has a nice graphite colour and is based on traditional technologies. With its eight sides, it is suitable for saunas of all shapes, and can even be placed in the middle of the room. Octa started its life as the Fantasy, which in turn was modified into a special version, the President – a one-off octagonal shape sauna heater, specially commissioned by President Mauno Koivisto for his official sauna.

LAAVA/SKLE

Our stylish, graphite Laava heater and the stainless steel finish SKLE are robust, safe and easy to maintain. The free-standing heaters are designed for public saunas. With 60 kg of stones, they give enjoyably soft heat even for larger saunas.

A proper sauna is a strong selling point for hotels, gyms, spas and sports centres. Our large-scale heaters are not only well-made but also energy-efficient and user-friendly.

MAGMA/SKLA

The Magma heater in graphite and the SKLA in stainless steel are meant for large public saunas which require a reliable, powerful and cost-effective heater. They give rich heat and steam that engulf the entire sauna room in a pleasant atmosphere.

Don't forget your stones!

SAUNA STONES

"Olivine dolerite" is a hard stone material which is formed uneven so air pockets can be created between the stones.

Sauna stones 20 kg. Under 100 mm. Wall mounted. Item no. 0043020

Sauna stones 20 kg. Larger than 100 mm. For floor mounted and commercial heaters. Item no. 0043022

HELO CASSETTES & CERAMIC SAUNA STONES

Ceramic stones for commercial use are made of clay that can be heated up to 1300 °C.

CONTROL PANELS

Control your sauna with a smart control panel. The Pure stands for simplicity and functionality. The Elite Free is cloud based and can have multiple user profiles so the perfect option for the commercial spa facility.

Pure

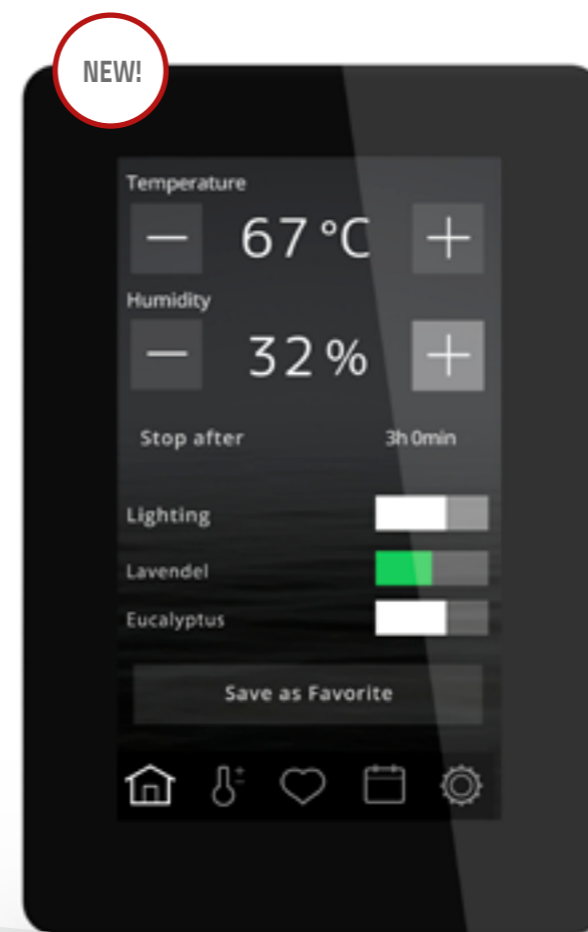

INTUITIVE DESIGN AND FEATURES

The elegant, compact design of the Pure control panel makes it the go-to choice for those who value functionality and simplicity. The thin black control lets you set the lighting, temperature and sauna time easily with only a few touches. Of course, choosing the start time up to ten hours in advance means you can step into a wonderfully hot sauna or steam as soon as you get home. (Door switch is included with Pure control panel.)

PLACEMENT OF THE CONTROL PANEL

We recommend placing the control panels outside sauna room, due to lower temperatures. If control panels are placed inside sauna room, make sure the temperature is always below 80 degrees.

Elite Free

EFFORTLESS BATHING

The new control panel Elite Free has been updated with cloud based functionality so you can control your sauna from anywhere! Why not have it ready when you come in from the ski slope or an exhausting car ride on the way home from work.

It is packed with advanced features, thanks to its internal processor and operating system. In addition to highly personalized settings, the Elite Free can be individually programmed according to your own schedule. Add features such as auxiliary fans, fragrance pumps or lights – the Elite Free control panel handles it all with clear and concise precision. The 4.5-inch touch screen delivers real-time status on every aspect of your sauna and steam bath. Door switch is included with Eite Free control panel to ensure the cloud functionality.

SAUNA ACCESSORIES

BRILLIANT ACCESSORIES

This new series has been developed in collaboration with Italian designer, Paola Garatto. The beautiful diagonal shape is inspired by the water waves. It includes bucket, ladle, thermometer, hygrometer and hourglass and is offered in beautiful matt Black or glamorous Silver grey.

It features aluminium which is anodised and sand-blasted for a real quality finish and longevity. The handle on the bucket is light birch, reinforced with aspen for strength.

In addition to the stylish design, the bucket has a clever functional spout to enable more accurate pouring of water – ideal for filling the water tank on Helo heaters.

MEET THE DESIGNER, PAOLA GARATTO

Paola Garatto designed the Brilliant sauna accessory series in collaboration with TylöHelo. Sometimes, sauna related products do not fit well with the modern home sauna or luxurious spa. In response, Garatto created elegant sauna accessories which suit well with a wide variety of sauna interiors. The concept reflects TylöHelo's company principles, combined with modern Nordic aesthetic features. The materials chosen combine practicality with pleasant appearance – a great complement to the environment and enhancement to the sauna experience.

Paola Garatto is a Venice-born Freelance Designer based in Helsinki (FI) and Venice (IT), working in multidisciplinary design projects. Her designs are reflecting the principles and values of industrial design channelled into fashion statements. She takes inspiration from high-quality Italian craftsmanship, blended with the progressive Nordic design aesthetics and values.

SALT

Salt from Himalaya functions as an air cleaner in your sauna. Just place some salt rocks on the grill or lid of your Helo-WT heater, or put the smaller salt granules in the tank. It gives you a fresh and healthy atmosphere that is especially good for your skin and your airways.

Himalayan Pink Salt Granules 1 kg Item no. 3817478

Himalayan Pink Salt Rocks 1 kg Item no. 3817479

You can place rock salt, birch leaves, herbs or sauna essences on top of the water tank. Find more at tylohelo.com/helo

STEAM BATH

The concept of steam bathing dates back to the Roman times. Compared to the traditional Finnish sauna, the temperature of a steam sauna is considerably lower and the humidity up to 100%. A steam bath deep cleanses and moisturises the skin, rejuvenates tired muscles and relaxes the mind.

CHECK OUT A FEW OF OUR TIPS BELOW FOR A SMOOTH-RUNNING STEAM ROOM PROJECT:

1 Make sure your generator is powerful enough for the size of your steam room:

Room volume (m³) x K1 x K2 = required power (kW)

Constants:

- Ventilated room K1 = 0.75
- Acrylic room K2 = 1
- Tiles on insulating concrete K2 = 1,50
- Non ventilated K1 = 0.52
- Tiles on board or hard foam K2 = 1,25
- Heavy wall of concrete or tiles K2 = 2

2 Plan your steam room with proper drainage as a top priority. The steam generator will be emptied of water and flushed frequently so make sure it is placed in the immediate vicinity of a drain. For generators installed for commercial use, the optional automatic drain function is required.

3 Test the hardness of your mains water to predetermine the frequency of maintenance.

4 Most of the limescale build-up in the steam generator is removed during the automatic flush sequence, but some deposits always remain. In commercial use, it is therefore usually necessary to manually descale and clean tank walls and heating elements from time to time. In commercial settings, the generator must be flushed at least daily.

STEAM GENERATORS

Our durable steam generators work reliably even when used continuously, with minimal maintenance and service costs. They are equipped with several convenient features for the best experience.

HELO STEAM PRO

An advanced steam generator for commercial use with a lot of smart features included like; standby function, automatic flush, safety flush, two aux outputs for fragrance/salt, ganging with RJ connectors (1+2units), resettable high limit switch, new drain valve. Push button for activation from standby is available as add-on.

HELO STEAM

Engineered for minimal use of electricity and water but provide maximum enjoyment. A steam generator that suits residential use that comes with two aux outputs for fragrance or salt and resettable high limit switch. Available add-ons are new drain valve and automatic flush.

INFRARED

COMBINATION SAUNA 2 IN 1

Why limit your sauna enjoyment? Enjoy the infrared heat in a traditional Helo sauna! The health benefits of infrared panels will complement your traditional sauna and give you more options. We have glass infrared panels in grey and black. You can have them combined in your sauna or use them to build a customised infrared room.

The glass panels comes with alder frame and we recommend to also buy a matching backrests, since the glass gets hot.

Glass Infra panels

Product	Item no.	Size in mm	Power/ Voltage
Glass Infra panel, black*	0038961	910 X 310 mm	900W, 230V
Glass Infra panel, grey*	0038962	910 X 310 mm	900W, 230V
Backrest, alder	0038963	390 x 710 x 60 mm	
Control panel 60 minutes	001560		

*You need to buy the backrest art. 0038963 in order to have a complete set.

IR-KIT

You can now use IR-panels and heater with same Elite Free control panel. Here are the options to buy a set:

DOMESTIC USE:

WE 54 IR KIT (Item no. 001355) + IR-PANELS + HEATER;
ROCHER ELITE / HIMALAYA ELITE OR ROXX ELITE

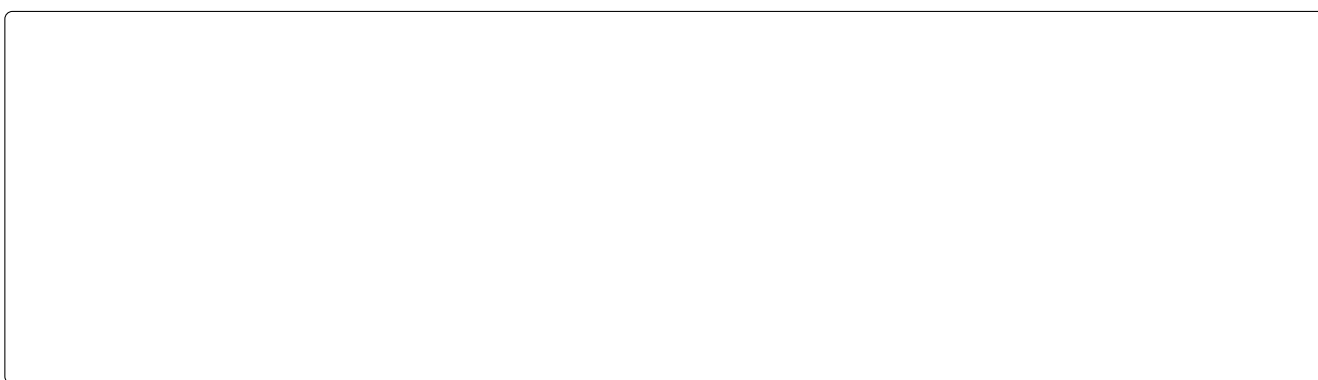

COMMERCIAL USE:

WE 53 IR KIT (Item no. 001354) + IR-PANELS + HEATER; SKLE/
LAAVA OR OCTA + ELITE FREE CONTROL PANEL
